

How to Participate in the Stentorian Presale

Project Stentorian is offering a presale for their SEL token on the Binance Smart Chain (BSC) network. To participate, you'll need to set up a MetaMask wallet, connect it to the BSC network, and manually import the SEL token. This guide will walk you through the process step-by-step, ensuring you can safely and effectively join the presale on [Project Stentorian's Official Website](#).

Setting Up MetaMask and BSC Network

1

Install and Set Up MetaMask Wallet

- **Install MetaMask**: Download and install the MetaMask browser extension from the [official MetaMask website](#).
- **Create a Wallet**: After installation, create a wallet and securely save the Secret Recovery Phrase. This phrase is essential for wallet recovery, so do not share it with anyone.

2

Add Binance Smart Chain (BSC) Network to MetaMask

- **Add Network**: Open MetaMask, click on the network dropdown at the top, and select "Add Network."
- **Enter BSC Network Details**: Fill in the following information:
 - Network Name: Binance Smart Chain
 - New RPC URL: <https://bsc-dataseed.binance.org>
 - Chain ID: 56
 - Currency Symbol: BNB
 - Block Explorer URL: <https://bscscan.com>
- **Save**: Click "Save" to add the BSC network.

3

Deposit BNB into MetaMask

- **Buy BNB**: Purchase BNB from a cryptocurrency exchange that supports BNB.
- **Transfer BNB**: Send the BNB to your MetaMask wallet address on the BSC network. Ensure you select BEP-20 (BSC) as the transfer network.

Participating in the Stentorian Presale

1

Access the Official Website

Visit [Project Stentorian's official website](#).

2

Connect MetaMask

Click the "Connect" button on the website to link your MetaMask wallet. Confirm the connection request in the MetaMask popup.

3

Buy SEL Tokens

On the presale page, enter the amount of SEL tokens you want to buy and click "Buy" or "Participate."

4

Confirm Transaction

Review the transaction details in the MetaMask popup, ensure you have enough BNB for gas fees, and click "Confirm" to complete the transaction.

Manually Adding SEL Token to MetaMask

Get Token Contract Address

The contract address for the SEL token is:
0xC0FEAA7074732DB50fb4eb90
d38e2c11f5abB8ee

Add Token

Open MetaMask, scroll down, and click "Import Tokens."

Enter Custom Token Details

In the "Custom Token" tab, enter:

- Token Contract Address:
0xC0FEAA7074732DB50fb4eb90
d38e2c11f5abB8ee
- Token Symbol: SEL
- Decimals of Precision: 18

Complete Token Addition

Click "Next" and then "Add Token" to see the SEL token balance in your MetaMask wallet.

Important Notes and Security Reminders

Sufficient BNB for Gas Fees

Make sure to have enough BNB in your MetaMask wallet to cover transaction fees.

Enter Accurate Information

Input the correct contract address and other details to avoid potential asset loss.

Security

Keep your Secret Recovery Phrase and private keys secure and never share them with others.

Following these steps will allow you to participate in the Stentorian presale safely and effectively.
